### **L-3 WESCAM LAUNCHES NEW ELEARING COURSE FOR MX™-SERIES OF EO/IR TURRETS**

DUBAI AIR SHOW, UAE, November 15, 2011 – L-3 WESCAM announced today that its customer service department has achieved yet another growth milestone with the launch of an eLearning training solution for operators and maintainers of various MX™-Series EO/IR imaging and targeting turrets.

L-3 WESCAM's eLearning solution has been designed to teach the detailed operation and maintenance skills required to maximize system performance. This cost-effective training course is ideal for both those new to operating and maintaining MX-Series turrets, as well as experienced personnel who may require refresher training. Modeled after L-3 WESCAM's traditional in-class course, the eLearning alternative covers theory, operations and maintenance topics in an interactive, scenario-based format. Specific system operations and maintenance tasks can be accessed quickly, making the course a powerful reference tool in the field.

"In a world where details matter, educated operators and maintainers are key to mission success," said Rod Till, vice president of customer service for L-3 WESCAM. "Our eLearning solutions offer significant advantages in an industry where operational effectiveness is paramount, and cost is often a limiting factor when considering traditional classroom-based instruction."

L-3 WESCAM's eLearning course translates to an estimated 70 percent cost savings over traditional courses, significantly expanding an organization's training program. Modular in design, the course takes an estimated 12 hours to complete. Each module uses knowledge checks to allow students to apply the newly acquired information. At the end of the course, a completion certificate is supplied. A sample module can be requested by accessing the following link: [www.wescam.com/cs/training/elearning](http://www.wescam.com/cs/training/elearning). For more information on this course and others available through L-3 WESCAM, please go to <http://www.l3com.com/wescam/cs/training/>

L-3 WESCAM is a world leader in the design and manufacture of stabilized, multi-spectral airborne imaging systems. To learn more about L-3 WESCAM, please visit the company's website at [www.wescam.com](http://www.wescam.com).

Headquartered in New York City, L-3 Communications employs approximately 61,000 people worldwide and is a prime contractor in C3ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems, aircraft modernization and maintenance, and government services. L-3 is also a leading provider of a broad range of electronic systems used on military and commercial platforms. The company reported 2010 sales of \$15.7 billion.
