L3 WESCAM Launches Smarter, More Accurate Imaging and Processing Technologies

SINGAPORE, February 6, 2018 – L3 WESCAM announced today that it has created smarter, more technologically advanced electro-optical and infrared (EO/IR) systems by incorporating high-performing imaging and processing technologies into its MX™-Series product line. These new technologies will enable MX operators to conduct missions with enhanced image processing and greater visual capabilities than ever before.

“Today’s environments are more complex, and missions need to be executed with more assurance,” said Paul Jennison, Senior Vice President of Strategy and Business Development for L3 WESCAM. “L3’s newly incorporated smart technologies provide a portfolio of capabilities that will help operators succeed through a combination of ease-of-use and robust performance.”

Newly launched imaging technologies include the addition of higher-sensitivity cameras that offer advanced imaging capabilities across a much wider range of illumination conditions, thereby advancing operator capabilities in low-visibility and no-visibility environments.

Advancements to L3’s MX image processing technologies include WESCAM’s embedded Advanced Video Engine (WAVE) and a newly embedded Graphics Processing Unit (GPU). L3 WESCAM’s new Automated Video Tracker (AVT) and embedded Moving Target Indicator (MTI) technologies are supported by this new architecture and provide automatic target acquisition of multiple targets with significantly improved target lock performance in challenging mission scenarios.

L3’s significant investment in its image processing technologies has made the MX product line smarter, as the WAVE’s architecture supports future growth and allows for the rapid deployment of future image processing techniques.

L3 has more than 40 years of experience in the design and delivery of stabilized imaging and targeting solutions. Systems range in size from 8 to 25 inches in diameter, portray clear sighting capabilities across the visible and infrared spectrums, and operate with outstanding stabilization and leading range performance.

L3 WESCAM is a world leader in the design and manufacture of stabilized, multi-spectral imaging systems. To learn more about L3 WESCAM, please visit the company's website at www.WESCAM.com.

Headquartered in New York City, L3 Technologies employs approximately 31,000 people worldwide and is a leading provider of a broad range of communication, electronic and sensor systems used on military, homeland security and commercial platforms. L3 is also a prime contractor in aerospace systems, security and detection systems, and pilot training. The company reported 2017 sales of \$9.6 billion.
