L3 WESCAM Opens Authorized Service Center in Madrid, Spain

– Facility Maximizes Operational Effectiveness With Regional 24/7 Support –

FARNBOROUGH, England, July 17, 2018 – L3 WESCAM announced today that it has signed an agreement with European Optronics Services S.L. (EOS) to open a WESCAM Authorized Service Center (WASC) in Madrid, Spain. The 1,744-square-foot facility will maintain L3's MX™ - Series of electro-optical and infrared (EO/IR) imaging turrets operated by customers located across Spain, Portugal and Algeria. The center is expected to be operational in early 2019.

The EOS facility will be equipped with the tooling required for optical alignment and other equipment necessary to ensure MX systems can be maintained in-region at an advanced service level. With a dedicated team assembled and trained to support MX systems operating across the air, land and maritime domains, customers will see an increase in operational availability and shorter turnaround times.

"We are proud to deliver a stronger, globally diverse in-service support network for our customers," said Rod Till, Vice President of Customer Service for L3 WESCAM. "By working with innovative companies like EOS that are located in strategic regions, we will continue to grow our in-service support structure and see an immediate increase in customer satisfaction."

Deployed in close proximity to L3's customers, other strategically located facilities can be found throughout the United Kingdom, Australia, Japan, Spain, Germany, Jordan, the United States, Saudi Arabia, the United Arab Emirates and Canada. Additionally, L3 is preparing to open more WASCs later this year in the Asia region.

Providing service and support where and when they are needed, L3's global in-service support facilities also incorporate remote diagnostic testing of fielded operational systems; service representatives available for dispatch 24/7 from any WASC; eLearning; and classroom, in-flight and in-vehicle training; in addition to mission simulation and mission rehearsal training.

L3 WESCAM is a world leader in the design and manufacture of stabilized, multispectral imaging systems. To learn more about L3 WESCAM, please visit the company's website at www.WESCAM.com.

Headquartered in New York City, L3 Technologies employs approximately 31,000 people worldwide and is a leading provider of a broad range of communication, electronic and sensor systems used on military, homeland security and commercial platforms. L3 is also a prime contractor in aerospace systems, security and detection systems, and pilot training. The company reported 2017 sales of \$9.6 billion.
