US Army Orders L3Harris Technologies' Electro-Optical Sensor Suite to Enhance Unmanned Air Systems

Highlights:

- Addresses urgent needs for U.S. Army modernization
- Positions company as a key Army sensor supplier for years to come
- Reflects 20-plus year legacy and on-time delivery

MELBOURNE, Fla., Oct. 14, 2019 — The U.S. Army has ordered electro-optical sensor suites from L3Harris Technologies (NYSE:LHX) to provide high-precision situational awareness for its unmanned air systems. The order is part of a \$454 million, multi-year IDIQ contract awarded to L3Harris WESCAM in 2018.

L3Harris will provide 65 WESCAM MX™-10D electro-optical, infrared and laser designator sensor suites as part of a production order to support the Army's Tactical Unmanned Air Systems Shadow UAV (RQ-7Bv2) program. The order follows the successful on-time delivery of eight MX-10D's for the program's First Article Testing/qualification milestone, which successfully transitioned to an approved Limited Rate in Production (LRIP) order.

The MX-10D is the most airworthy, robust and reliable electro-optical sensor suite available. The sensor suite provides high-precision situational awareness with extended standoff target identification, precision geolocation and laser designation to the Army's air-ground maneuver team. It delivers an advanced capability to collect critical mission information and prosecute targets at extended ranges to assist in overcoming emerging regional and global threats.

"These are the first of many systems the Army will receive over the next year in support of the Shadow program and its modernization strategy," said Jacques Comtois, General Manager, L3Harris WESCAM. "We continue to deliver on-time, innovative technologies that provide warfighters with the most protection against new and emerging threats."

L3Harris has delivered more than 1,100 WESCAM MX airborne and land-based systems since 1996 in support of U.S. Army programs.

About L3Harris Technologies

L3Harris Technologies is an agile global aerospace and defense technology innovator, delivering end-to-end solutions that meet customers' mission-critical needs. The company provides advanced defense and commercial technologies across air, land, sea, space and cyber domains. L3Harris has approximately \$17 billion in annual revenue and 50,000 employees, with customers in 130 countries. [L3Harris.com](https://www.l3harris.com).

Forward-Looking Statements

This press release contains forward-looking statements that reflect management's current expectations, assumptions and estimates of future performance and economic conditions. Such statements are made in reliance upon the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The company cautions investors that any forward-looking statements are subject to risks and uncertainties that may cause actual results and future trends to differ materially from those matters expressed in or implied by such forward-looking statements. Statements about system capabilities and anticipated contract awards are forward-looking and involve risks and uncertainties. L3Harris disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.
